

## **Tests and Assessments Related to the Field of Aging as Referenced in AARP's AgeLine Database**

April 2006

AgeLine describes hundreds of journal articles in which a test or assessment is the focus of a study or analysis. This list provides a quick reference to over 600 measures used in the field of aging that are the focus of research abstracted and indexed in AgeLine, the world's premiere gerontology database.

### **How to use when searching AgeLine at [www.aarp.org/ageline](http://www.aarp.org/ageline):**

Entering a test or assessment name into the "Subject" search field will retrieve all records in which the instrument is the focus of an article, while entering a test or assessment name in the "Basic" or "Any Word(s)" fields will retrieve all records in which the instrument is mentioned anywhere in the title or abstract of an article (usually resulting in a larger number of hits). Punctuation is not used in these terms due to the limitations of multiple search platforms. For more information, contact us at [ageline@aarp.org](mailto:ageline@aarp.org).

### **Resident Assessment Instrument**

A uniform patient assessment instrument designed to identify significant changes in long term care residents over time. It includes the Minimum Data Set and the Resident Assessment Protocols. Mandated by the Omnibus Budget Reconciliation Act of 1987, all Medicare and Medicaid certified facilities use it to conduct periodic assessments on each of their residents.
