Support for Plan

After hearing the details of the House plan, as well as the statement below from AARP endorsing it, a majority of members support President Obama and Congress’ plan to reform health care.

In the health care debate, AARP has chosen a side – yours. That’s why we’re endorsing the health care reform plan in the House of Representatives. Because it ensures you’re not denied insurance because of pre-existing conditions or age. It ensures your health care doesn’t take a back seat to insurance companies and no one – not insurance companies or the government – comes between you and the doctors and specialists you choose. Most important, AARP endorses reform because it protects seniors’ benefits and Medicare – so it’s there for seniors now and for future generations. AARP is fighting for you – because your health is worth fighting for.

As Figure 4 shows, 43% of members “strongly” support the plan and 26% “somewhat” support it, after hearing the elements of the plan and the statement above. In fact, the percent of members who strongly support the plan exceeds the total percent who oppose it. While a partisan divide is evident when respondents are asked about the current plan in Congress, AARP members support the legislation by a margin of roughly two to one.
