

**This biologic drug could save her life.**

**Unfortunately, she can't afford it.**

Biologic drugs have brought breakthrough therapies to the treatment of serious diseases such as cancer, MS and Alzheimer's. Sadly, many of these drugs are extraordinarily expensive, and many patients simply cannot afford them.

Generic drugs save consumers and the health care system billions of dollars. The time has come to give the FDA the authority to approve a workable process for the approval of generic forms of biologics. **The time is now. The science is here. Pass S. 623 – The Access to Life-Saving Medicine Act.**
