

I am committed to working with my colleagues across the aisle to develop and implement policies that provide all Americans with access to quality, affordable health care and lifetime financial security. I understand that Americans want answers, action and accountability from their elected officials – not legislative stalemate. The time has come to address these critical national priorities.

I pledge to work across party lines to sponsor or support legislation that seeks to:

- Provide every American with access to quality, affordable health care, including:
 - information about the quality, cost, and effectiveness of health care services
 - policies that prevent illness and promote good health
 - policies that reduce health care costs while maintaining quality of care
 - the development of secure health information technology and electronic health records
 - choices when it comes to long-term care service delivery and affordable financing options;

- Strengthen Social Security in a manner that treats all generations fairly;

- Provide Americans with greater access to retirement plans, financial incentives to save, and tools to better manage their finances and help prepare them for retirement; and

- Develop policies that help ensure that all workers—regardless of age—can continue to work and contribute to society.

Signed,
