AARP is a nonprofit, nonpartisan membership organization for people 50 and over. We provide information and resources; advocate on legislative, consumer, and legal issues; assist members to serve their communities; and offer a wide range of unique benefits, special products, and services for our members. These benefits include AARP Webplace at www.aarp.org, Modern Maturity and My Generation magazines, and the monthly AARP Bulletin. Active in every state, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands, AARP celebrates the attitude that age is just a number and life is what you make it.

Key Findings

AARP’s first ever election day poll of voters and likely voters age 45+ in Florida Congressional District 24 found that protecting Social Security, the economy and corporate responsibility are dominant issues in determining which candidate to support, with over seven in ten saying they are very important.

- Approximately eight in ten (79%) say protecting Social Security was very important to their voting decisions.
- The economy (75%) and corporate responsibility (74%) are cited as very important by almost the same proportion of voters and likely voters.
- More than half (56%) say adding prescription drug coverage to Medicare was very important to their decisions about which Congressional and Senate candidates to vote for.

Florida Congressional District 24 voters and likely voters age 45+ consider passing laws protecting Social Security and adding prescription drug coverage to Medicare to be top or high priorities for the next Congress.

- When Congress returns to Washington in January 2003, more than three in four consider passing legislation to protect Social Security to be a top (53%) or high (25%) priority for the next Congress.
- Similarly, seven in ten consider passing a law to add prescription drug coverage to Medicare to be a top (37%) or high (33%) priority.

Methodology

AARP commissioned ICR, a national survey research firm, to conduct a random digit dial (RDD) telephone survey of voters and likely voters age 45 or older in Florida Congressional District 24. Respondents were screened for age and for their likelihood of voting. A total of 402 interviews were completed from November 2 through noon, November 5, 2002. The survey has a sampling error of plus or minus 5 percent. This means that in 95 out of 100 samples of this size, the results obtained in the sample would fall in a range of 5 percentage points of what would have been obtained if every voter and likely voter in Florida Congressional District 24 age 45 or older had been surveyed. Responses to all survey questions are in the attached annotated questionnaire.
