AARP's New York State Office, in response to its commitment to protect Social Security and Medicare for all state residents, commissioned this survey to explore the views of its registered voters over the age of 50 in Congressional District 24 about proposals to cut Social Security and Medicare as a way to reduce the federal deficit.

These results are based on a telephone survey, fielded July 7 through July 11, 2011 of registered voters over the age of 50 in Congressional District 24 in New York. A total of 402 interviews were completed yielding a sampling error of +/- 4.9 percent. An annotated survey of responses begins on page 2, and a detailed methodology is on page 13.

SURVEY-IN-BRIEF

- ❖ **While residents of Congressional District 24 over the age of 50 are very concerned about the federal deficit, they oppose reductions in Social Security and Medicare benefits to help reduce the deficit.**
 - ✓ Over seven in ten (73%) are very concerned about the federal budget deficit.
 - ✓ Nearly eight in ten (78%) oppose raising the debt limit if it means there will be cuts to Social Security and Medicare for current beneficiaries.

- ❖ **Residents of Congressional District 24 over the age of 50 believe seniors should not pay higher Medicare costs or be forced into nursing homes in order to reduce the deficit.**
 - ✓ Nearly eight in ten say they are less likely to reelect their member of Congress if they support a proposal that requires seniors to pay higher Medicare premiums (77%) or pay higher out of pocket costs for Medicare services (80%).
 - ✓ Eight in ten (81%) oppose legislation that could result in cuts to services that help older Americans and people with disabilities remain in their own homes rather than go into a nursing home.

- ❖ **Residents of Congressional District 24 over the age of 50 oppose Social Security benefit reductions and are less likely to reelect members of Congress who support these cuts.**
 - ✓ Over eight in ten (83%) oppose a current proposal to change the calculation for the Social Security Cost of Living Adjustment (COLA) that would immediately and permanently reduce seniors' annual COLA.
 - ✓ Nearly eight in ten (78%) say they are less likely to reelect their member of Congress if they support cutting Social Security benefits to help reduce the deficit.

Methodology

AARP New York commissioned a research study to explore the opinions of registered voters over the age of 50 in New York Congressional District 24 on Social Security and Medicare. Woelfel Research Inc. conducted this telephone survey between July 7 and 11, 2011. A total of 402 interviews were completed. A sample of this size has a sampling error of plus or minus 4.9 percent at a 95 percent confidence level. Survey responses were not weighted because there is no reliable data available for registered voters at the Congressional District level. Interviewing was completed with a final response rate of 33 percent, cooperation rate of 91 percent, and refusal rate of 7 percent. The response, cooperation, and refusal rates were calculated according to AAPOR standards RR3, CCOP3, REF3.
