

# Long-Term Care in Iowa

**The number of Iowa residents age 85 and older is projected to grow by 36 percent by 2030.**

Iowa's older population can be at greater risk for chronic illnesses and in need of long-term care. Fifteen percent of Iowa's population is age 65+ with over 78,000 residents age 85+.<sup>1</sup> Iowa's age 85+ population – the age group that is most likely to need long-term care services – will grow 36% from 2007 to 2030.<sup>2</sup> This makes Iowa the 49<sup>th</sup> ranked state in the projected growth rate of the 85+ population.

**Most prefer to receive long-term care at home; however, Iowa spends the majority of the state's Medicaid funds on institutional care.**

The majority of Americans age 50+ (89%) want to stay in their homes for as long as they can.<sup>3</sup> Nearly 455,000 Iowans rely on Medicaid, and nine percent are age 65+.<sup>4</sup> Home and community-based service (HCBS) waivers allow Medicaid recipients to receive Medicaid funding for in-home care. In Iowa, Medicaid allows some to choose in-home care instead of nursing home care. In 2006, 9,732 Iowans 65+ and 686 adults (18-64) with disabilities received a waiver.<sup>5</sup> In 2008, there were no people 65+ who waited to receive a waiver.<sup>6</sup> On average, the Medicaid program can provide HCBS to three people for the cost of serving one person in a nursing home.<sup>7</sup>

Iowa spends 14% of its Medicaid long-term care dollars for older people and adults with physical disabilities on home and community-based care – ranking it 35<sup>th</sup> in spending on home care services for this population.<sup>8</sup>

In addition, 300,000 Iowans are providing family caregiving to a loved one at home. This care is valued at \$3.4 billion.<sup>9</sup>

**Iowa has one of the lowest average nursing home private pay rates in the nation at \$137 per day.**

In 2007, Iowa's nursing homes had an occupancy rate of 80%.<sup>10</sup> In 2008, Iowa had some of the least expensive nursing homes in the country, with an average private pay daily rate of \$137.<sup>11</sup> Iowa's average rates for home health aides (\$20/hr private pay and \$36/hr Medicare-certified) were close to the national average, but its rate for adult day care (\$66/day) was higher than the national average.<sup>12</sup>

**One-third of Iowa's nursing homes rated above average in health inspections.**

The Centers for Medicare and Medicaid Services (CMS) created a five-star quality rating to help consumers compare nursing homes. CMS rates nursing homes on health inspections, staffing, and quality measures.

The health inspection process is comprehensive and conducted by a trained team of objective surveyors.<sup>13</sup>

Recent studies have found that non-profit nursing homes generally deliver higher quality of care.<sup>14</sup> In 2007, 51% of Iowa's nursing homes were for profit (44%, non-profit; 5%, government-owned).<sup>15</sup>

**Few Americans have long-term care insurance.**

Nationally, about 7 million long-term care insurance policies were in effect in 2005, and the typical purchaser was age 61 with assets over \$100,000.<sup>16</sup> Cost is a major factor in the decision to purchase long-term care insurance. In 2008, premiums for a married couple in their sixties were about \$3,000 a year.<sup>17</sup> Iowa has adopted the most recent long-term care insurance recommendations from the National Association of Insurance Commissioners (NAIC).<sup>18</sup>

## End Notes

The data utilized in this report is the most recent publicly available data collected for all states.
