

Long-Term Care in Kentucky

The number of Kentucky residents age 85 and older is projected to grow by nearly 50 percent by 2030.

Kentucky's older population can be at greater risk for chronic illnesses and in need of long-term care. Thirteen percent of Kentucky's population is age 65+ with nearly 75,000 residents age 85+.¹ Kentucky's age 85+ population – the age group that is most likely to need long-term care services – will grow 48% from 2007 to 2030.² This makes Kentucky the 36th ranked state in the projected growth rate of the 85+ population.

Most prefer to receive long-term care at home; however, Kentucky spends most of the state's Medicaid funds on institutional care.

The majority of Americans age 50+ (89%) want to stay in their homes for as long as they can.³ Nearly 838,000 Kentuckians rely on Medicaid, and 11% are age 65+.⁴ Home and community-based service (HCBS) waivers allow Medicaid recipients to receive Medicaid funding for in-home care. In Kentucky, Medicaid allows some to choose in-home care instead of nursing home care. In 2006, 11,736 Kentuckians 65+ with disabilities and 64 adults (18-64) with disabilities received a waiver.⁵ There were no waiting lists for these groups in 2008.⁶ On average, the Medicaid program can provide HCBS to three people for the cost of serving one person in a nursing home.⁷

Kentucky spends eight percent of its Medicaid long-term care dollars for older people and adults with physical disabilities on home and community-based care – ranking it 46th in spending on home care services for this population.⁸

In addition, 530,000 Kentuckians are providing family caregiving to a loved one at home. This care is valued at \$5.4 billion.⁹

Kentucky's average nursing home private pay rate is lower than the national average at \$177 per day.

In 2007, Kentucky's nursing homes had an occupancy rate of 90%.¹⁰ This care is expensive. In 2008, Kentucky's nursing homes ranked 31st in the country with the average nursing home private pay daily rate of over \$170.¹¹ Kentucky also had one of the highest rates for Medicare-certified home health aides (\$62/hr) but had one of the lowest rates for non-Medicare-certified home health aides (\$16/hr). Kentucky's average private pay rate for adult day care was \$56 per day.¹²

One-third of Kentucky's nursing homes rated above average in health inspections.

The Centers for Medicare and Medicaid Services (CMS) created a five-star quality rating to help consumers compare nursing homes. CMS rates nursing homes on health inspections, staffing, and quality measures.

The health inspection process is comprehensive and conducted by a trained team of objective surveyors.¹³

Recent studies have found that non-profit nursing homes generally deliver higher quality of care.¹⁴ In 2007, 70% of Kentucky's nursing homes were for profit (27%, non-profit; 3%, government-owned).¹⁵

Few Americans have long-term care insurance.

Nationally, about 7 million long-term care insurance policies were in effect in 2005, and the typical purchaser was age 61 with assets over \$100,000.¹⁶ Cost is a major factor in the decision to purchase long-term care insurance. In 2008, premiums for a married couple in their sixties were about \$3,000 a year.¹⁷ Kentucky has not adopted the most recent long-term care insurance recommendations from the National Association of Insurance Commissioners (NAIC).¹⁸

End Notes
