Notes: (1) Data on caregiving prevalence were missing for Illinois, so the national average prevalence was used; (2) in Vermont, the median wage for home health aides was not available and was estimated as 1.084 times the median wage for personal care aides. For complete report and detailed methodology, please see Houser and Gibson, "Valuing the Invaluable: A New Look at State Estimates of the Economic Value of Caregiving" AARP Public Policy Institute, 2007, available at http://www.aarp.org/research/housing-mobility/caregiving/dd158_caregiving.html.
